

Welcome to Biology!

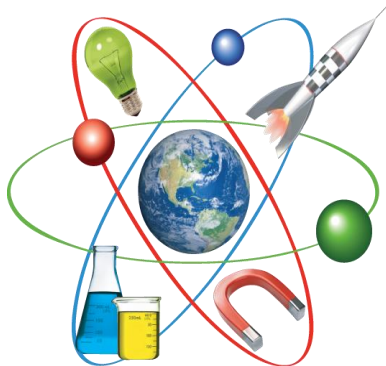

My name is Ms. Emily Richey and I am extremely excited to have you/your student in my class this year. This is my fourth year of teaching at CLV. I loved teaching here the last few years and am excited to continue my career at CLV. I look forward to exploring the natural and scientific world with you/your student in our Biology class.

A little about me: I am from East Aurora, NY. I moved to Syracuse, NY for college, where I attended Le Moyne College for Biology, Chemistry, and Elementary Education. After graduating from Le Moyne College, I lived in Rochester, NY completing my Masters in Adolescent Education for Biology and General Science at Nazareth College. I also substitute taught in two districts outside of Rochester. My hobbies include traveling, zumba/dance, and reading.

In Biology this year, we will learn about the structure and function of living organisms. We will then explore genetics and heredity. Next, we will study evolution. Finally, we will investigate ecology and human impact on ecosystems.

I look forward to exploring these topics with you/your student. Please let me know how I can help in any way. You can reach me by email at erichey@clvschools.org or by phone at (716) 257-3483 ext. 1113. If at any point throughout the year, you have questions, comments, or concerns, please contact me.

I am anticipating a wonderful year filled with exploration, collaboration, and inquiry. Looking forward to seeing you soon to kick off a great year!

~ Ms. Richey
